

Industrial E-Sprayer

The unique NanoNozzle™ tip improves spraying performance and efficacy for arenas, athletic facilities, food service establishments, housing, educational institutions, hospitality businesses, mass transit, transportation facilities, airports and other large public spaces. Our Industrial E-Sprayer is ideal for large applications where faster and greater coverage is necessary to save time and money.

NanoVapor's Industrial Sprayer incorporates airflow atomization to ensure that uniform properly sized droplets are dispersed evenly. The tiny droplets are electrostatically charged when sprayed and provide a thin, uniform coat over the applied surface.

Experience Unmatched Efficiency and Effectiveness

- The sprayer makes connecting to any liquid solution simple and fast to maximize efficiency for getting the job done.
- Sprayer body is wheeled for easy handling and control
- Airless technology.
- Power supply: 110 volts.
- Spray range: approximately 20 feet.
- Max. flow: 130 fl oz./min.
- Max. tip size: 0.031 in.
- Pressure range: Adjustable from 0-1,000 PSI.
- Particle size*: 30-110 microns
- Hose: Two ¼ in x 50 in.
- Tips included: NanoNozzle™ tips
- Our Industrial E-Sprayer easily outperforms other sprayers, misters and foggers by leveraging unique proprietary nozzle technology that turns the entire application area into a self-disinfecting zone.
